

# Use Case Description Document

**Use case ID:** C1

**Use case Name:** Order Vehicle

**Use Case Description:** The customer has the privilege and permission to invoke an order request regarding the car with full details of the car.

**Actors:** Customer is the only 'actor' involved in this use case

**Flow:**

**Normal Flow :** The customer enters his details and also places the order after verifying details.

**Exceptional Flow :** In case of wrong information the sales executive will get in touch with the customer

---

**Use case ID:** M1

**Use case Name:** Update Production Information

**Use Case Description:** The manufacturer keeps track of record of all the vehicles he produces and the dealers to which he has supplied each of them along with detailed information of each component.

**Actors:** Manufacturer is the only 'actor' involved in this use case

**Flow:**

**Normal Flow :** Manufacturer updates the production units' information.

---

**Use case ID:** M2

**Use case Name:** Update Status

**Use Case Description:** Manufacturer changes status of the order

**Actors:** Manufacturer is the only 'actor' involved in this use case

**Flow:**

**Normal Flow :** Manufacturer updates availability and status of the order so that the dealer can proceed with subsequent transactions.

---

**Use case ID:** D1

**Use case Name:** Place Order to Manufacturer

**Use Case Description:** The dealer places the order to the manufacturer.

**Actors:** Dealer is the only 'actor' involved in this use case

**Flow:**

**Normal Flow :** Dealer places a set of orders in equal intervals of time to the manufacturer.

---

**Use case ID:** D2

**Use case Name:** Get Order Status

**Use Case Description:** Dealer gets the information about the order processing by the factory to update the customers with their order status.

**Actors:** Dealer is the only 'actor' involved in this use case

**Flow:**

**Normal Flow:** Dealer gets the status of the order.

---

**Use case ID:** D3

**Use case Name:** Give notification to the customer

**Use Case Description:** Once the order is ready the customer is given the notification by the dealer.

**Actors:** Dealer is the only 'actor' involved in this use case

**Flow:**

**Normal Flow:** Dealer send an email to the customer once the order is processed.

**Exceptional Flow :** If the email is not available then the sales executive calls the customer personally and intimate the customer.

---

# Relational Database Design

**Table Name: Customer**

Name of Column	Data Type	Constraints
ID	Integer	PK, SK
Name	char	
Email	char	

**Table Name : Orders**

Name of Column	Data Type	Constraints
ID	Integer	PK
Status	char	
Vehicle_ID	Integer	FK referencing Orders
Customer_ID	Integer	FK referencing Customer
Dealer_ID	Integer	FK referencing Dealers, NOT NULL

**Table Name: Dealers**

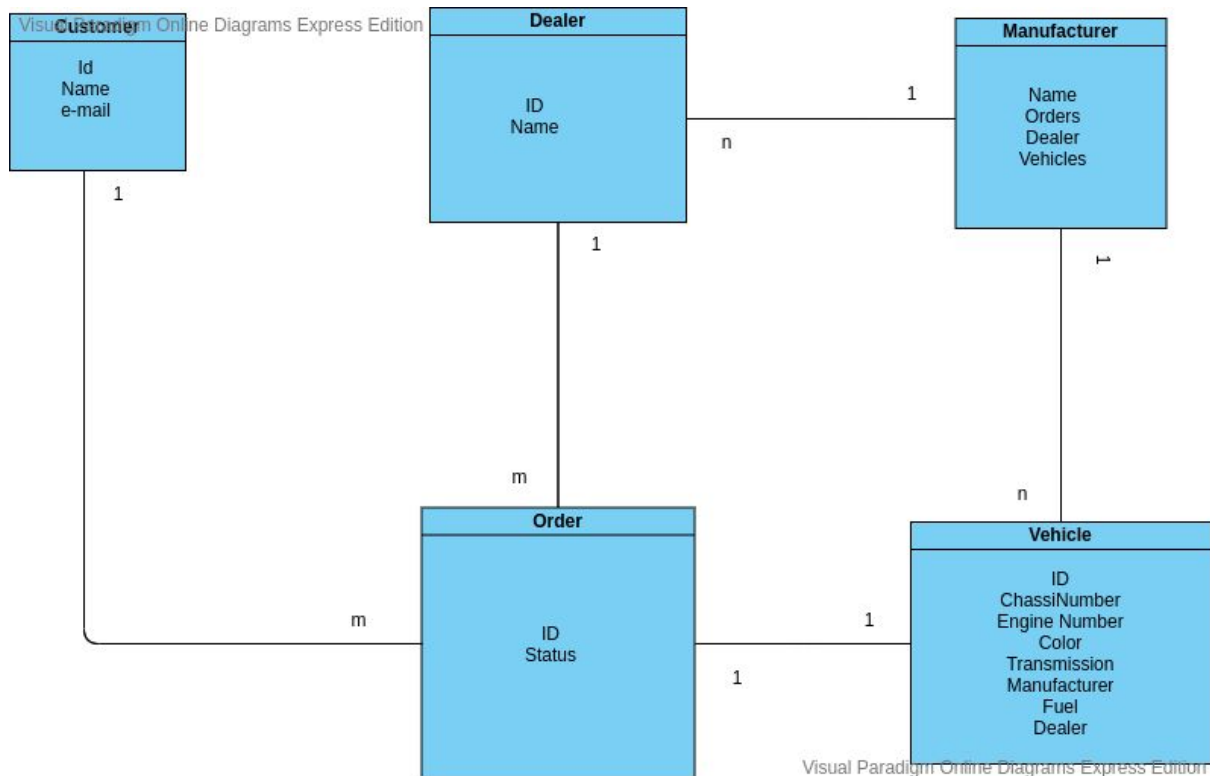

Name of Column	Data Type	Constraints
ID	Integer	PK, SK
Name	char	

**Table Name : Vehicle**

Name of Column	Data Type	Constraints
ID	Integer	PK, SK
Chassis Number	Integer	
Engine Number	Integer	
Fuel	char	
Transmission	char	
Order_id	Integer	FK referencing Orders, NULL constraint
Manufacturer	char	

There is no Manufacturer's table even though there is a class because according to the problem at hand, there is one and only one manufacturer.
